

Jim Logan  
Principal Architect, Everware-CBDI

Mr. Logan is an accomplished enterprise architect, ontologist, and system architect with over 25 years of experience in commercial product development and government consulting. He applies cutting-edge standards and innovative methodologies and tools to produce operational systems, specializing in Model Driven Architecture / Development approaches. Mr. Logan has extensive modeling experience spanning business, requirements, services, information, information exchanges, and systems. He has been involved in developing standards at the OMG for over a decade. He recently led the creation of a semantic, NIEM-conformant business domain model and nearly twenty extensive information exchanges, integrating them with a large government system being developed using an Agile approach.
